Think?

- check whether the data about containment zone is up to date

- user thinks that application can reduce a crowd in containment zones

Say?

- provide information about Containment zone

- monitor people's location an alert them

See?

- excited about trying something different

- worried about the changes

Feel?

-they feel like it's going to be so much work catching up

-help the user to pass in safe route

Pain

- bedsore

-mental health issues

Gain

-rest for few days

-time to think about life
